

PMC Soil Solutions Quality and Environmental Policy

PMC Soil Solutions is an expert consultancy specialising in the assessment of contaminated land and the identification, management and classification of soil waste through specialist site investigation and in depth analysis of the resulting data. PMC Soil Solutions also provide technical assistance and waste haulage in regards to the disposal of waste, especially problematic waste streams.

Protection of the environment in which we live and operate is part of PMC Soil Solutions' values and principles and we consider it to be sound business practice. Care for the environment is one of our key responsibilities and an important part of the way we do business.

In this policy statement we commit our company to:

- Meet and aim to exceed our clients' requirements and expectations;
- Comply and demonstrate good practice with all environmental legislation, regulations and approved codes of practice relevant to the business;
- Protect the environment by striving to prevent and minimise our contribution to pollution of land, air, and water;
- Seek to keep wastage to a minimum and maximise the efficient use of materials and resources;
- To minimise the environmental impact of the company for the life cycle (including plant, equipment and other physical assets under the control of the company/supplier);
- Manage and dispose of all waste in a responsible manner;
- Provide training for our staff so that we all work in accordance with this policy and within an environmentally aware culture;
- Regularly communicate our environmental performance to our employees and other significant stakeholders;
- Develop our management processes to ensure that environmental factors are considered during planning and implementation;
- Encourage any subcontractors or associated contractors to be more environmentally aware, preferably by holding the ISO 14001 accreditation;
- Monitor (by setting and measuring objectives) and continuously improving our quality and environmental performance; and
- Continue to improve the effectiveness of our integrated Quality and Environmental Management system.

To assist with the above, PMC Soil Solutions has implemented an integrated Management System that is certified to the requirements of ISO 9001:2008 and ISO14001:2004.

Meeting these standards is the responsibility of the entire team. PMC Soil Solutions is therefore committed to working with all stakeholders (including clients and those within the company's supply chain) to establish and maintain the highest quality standards and to support effective operation of the company's Quality and Environmental Management System and the achievement of goals and of specific Quality and Environmental Objectives.

The policy statement will be regularly reviewed and update as necessary. The management team endorses these policy statements and is fully committed to their implementation.

Signed

Paul Cordrey
Managing Director
